

# CROSSFIELD CHRONICLE

VOL. XXVII. No. 37

CROSSFIELD, ALBERTA, THURSDAY, AUGUST 10, 1933.

PRICE 1.50 A YEAR

## Week-end Suggestions

Sliced Pineapple, a delicious hot weather dessert	2 tins 25c
Corned Beef—ready to serve, tin	15c
Jelly Powders—with flavor of real fruit	4 for 25c
Mixed Cakes—as good as mother makes	25c
Special per lb.	25c
DOUGHNUTS—Every Friday and Saturday With the smack that others lack	dozen 25c
MIXED JAM—Jams are going higher and higher—4 pound tin	60c
FRESH RASPBERRIES and BLACKBERRIES, box	15c
FIELD TOMATOES per basket	35c
ECONOMY COFFEE--good at harvest time or any time	3 lbs. \$1.00
Sugar Crisp Corn Flakes	3 pkgs 25c
Sealer Rubbers—to fit all kinds of jars, 3 doz. for 25c	
Our Fresh Fruit Counters are showing this week: Plums, Apricots, Cherries, Apples, Grape Fruit, Blueberries, Canteloupe.	

## Halliday & Laut

### Tone Up the Ignition System

Let us test the battery and spark plugs, tighten up connections and your car will give you better service at less expense.

We sell Batteries, Tires, Tubes, Chains, and all other Automobile Accessories.

The real joy of motoring is a knowledge that your car is in perfect running condition.

### CROSSFIELD GARAGE

F. T. BAKER, Proprietor

Phone 4

Crossfield, Alberta.

### Harvest

and threshing time will soon be here! Do you need a new granary or open bin? Does your present granary need a roof or new floor? If so, drop in and let us tell you how cheaply it can be done.

We also carry binder reel slats and binder canvas slats—take home a few in case of emergency.

### Local Athletes Show Brilliance at Calgary Track Meet

Margaret Fitzpatrick Brakes Running Broad Jump Record. Veva Green Wins High Jump Events.

Margaret Fitzpatrick and Veva Green, local athletes, were the outstanding stars at the Olympic Club Track and Field Meet at Mewata stadium, Calgary on Saturday.

Miss Fitzpatrick leaped 16 feet 6½ inches in the running broad jump for intermediate girls and beat the old mark of 16 feet 4 inches made by Charlotte Daws of Edmonton. She was also timed in 10.2-5 seconds for the 80-metre sprint, a new event for intermediate girls.

Miss Fitzpatrick won the intermediate class championship with sixteen points, as the result of her winning the 80-metre run and the running broad jump. She was also second in both the women's open events, viz: 100-metres dash, and the running broad jump.

Veva Green won both the intermediate running high jump and the women's open running high jump. Veva cleared the bar at 4 feet 8 inches.

Dorothy Jones won the women's open class tournament championship, taking the 100-metre and running broad jump as well as finishing second in the high jump.

### Cremona Won First Money in Baseball Tournament

Cremona repeated their success of Sunday last, when they won the Bush League pennant, by winning the baseball tournament at Crossfield on Wednesday afternoon. Cremona defeated their old rivals Dog Pound, in the final game, by a score of 11 to 9.

**Dog Pound 12; Madden 10**  
Dog Pound defeated Madden in the first game by a score of 12 to 10. This game was featured by heavy hitting and numerous errors.

T. Borbridge and J. Lorimer were the battery for the winners; Ronnie McFadgen and K. Borbridge doing the heavy work for Madden.

### Cremona 4; Bottrel 3

Cremona and Bottrel hooked up in what proved to be the best game of the tournament and the best game played here this year. Cremona winning the contest by a score of 4 runs to 3.

Batters—Cremona : J. Tromes E. Springer and C. Springer; Bottrel : S. Pratt and E. Bundt.

### Cremona 11; Dog Pound 9

Cremona collected five runs in the first inning and it looked as if the game was in the can, but you never can tell in a ball game. Dog Pound had a chance to tie up the old game in the ninth, when Lake Parsons crashed a triple to deep right, he tried to stretch it into a homer, and was nipped at the plate, the next batter up hit safely and two runs crossed the plate before the side was retired. However the rally fell short just two runs and the final count was 11 runs to 9 in favor of Cremona.

Cremona—J. Tromes, E. Springer and C. Springer. Dog Pound : T. Borbridge and J. Lorimer.

The winners of the special prizes, donated by the business men of Crossfield, will be published in next week's issue. Tommy Borbridge, pitcher of the Dog Pound team, won the lions share of the special prizes.

### Cremona Pennant Winners

Cremona won the Bush League pennant by taking the third game, of a two out of three game series from Dog Pound by a score of 9 to 6. The game was played at Bottrel on Sunday afternoon and drew a large crowd.

Ed. Springer was on the mound for Cremona, and Tommy Borbridge for Dog Pound.

Miss Irwin of Calgary is the guest of Mrs. H. Ballam this week

### Board of Trade Luncheon Monday Evening, Aug. 14th.

A Board of Trade luncheon will be held at the Oliver Cafe on Tuesday evening next, commencing at 6.45.

The speaker for the occasion will be Mr. Howard Wright, who will give a talk on his visit to the World's Gran Fair at Regina.

The Executive Committee are anxious that as many members as possible attend this luncheon because important business will be brought before the meeting.

### Local News

Mr. and Mrs. Ed. Clark and family returned on Friday after spending a week with relatives at Vermilion. Ed. is driving a new Chevy.

Mr. and Mrs. O. E. Jones returned on Friday from Regina, where they attended the World's Gran Fair. O. E. drove back a new Chevrolet car.

Mr. and Mrs. J. McCool and daughter of Edmonton, spent the week-end with relatives here, and left on Monday for Banff.

The Misses Lilley Johnson and Dorothy Ingman left for Banff on Sunday where they will spend the week holidaying.

Mr. and Mrs. T. Christmas of Vancouver are spending a few days in town with their son, Len Christmas.

Roy Cameron had the misfortune to dislocate his right shoulder on Tuesday evening. He was swimming in the Beaver Dam near Madder and in diving into shallow water struck a rock with his shoulder.

Mrs. Chas. Weber and son Lorine who have been visiting relatives at Armstrong, B. C. returned home on Wednesday.

Mr. and Mrs. F. A. Purvis and Mr. and Mrs. Henry Purvis of Acheson motored to Banff on Saturday and returned Tuesday.

Miss Idella Dorsch and Miss Myrtle Carry left this week for Chicago, where they will take part in the World's Fair. Miss Carry expects to be home in about a month, while Miss Dorsch will continue on to Toronto, where she will spend a few months.—Carstairs News.

J. R. Gilchrist, who left here three weeks ago on a holiday trip to Toronto, has doubled back and is now enjoying the breezes of the Pacific coast. "Joe" will take over his duties as station agent at Glenwood, Alberta, south of Carlton.

Mrs. J. A. Emery, Miss Alice Collicutt and Miss Edith Seville returned from Edmonton Tuesday night after spending the past six weeks at the Provincial Summer School.

### Crossfield and District Amateur Athletic Association

A meeting of the Crossfield and District Amateur Athletic Association was held on Monday evening last at the office of the Atlas Lumber Co.

After due consideration the boundaries of the territory under the jurisdiction of the Association were decided upon as follows:

On the north by township 29 inclusive; on the south by township 27 inclusive; on the east by range 27, W. 4th. M. inclusive; on the west by range 3 W. 4th. M. inclusive.

The constitution and by-laws of the Association are being framed along the lines of the Trochu Amateur Athletic Association, and these are similar to those of the Amateur Athletic Union of Canada.

The colors of the Association are blue and gold, the same as those of the Crossfield school.

Membership tickets, for both men and women, will be in the hands of the Membership Committee tomorrow (Friday). A great many have expressed their wish to join up.

The splendid community spirit and love of clean sport of the people of Crossfield and the surrounding districts will assure the success of this Association.

## Specials

Friday and Saturday Aug 11th and 12th.

Corned Beef "Fray Bentos"	per tin	16c
Pickles, Sweet or Mustard	per jar	35c
Catsup "Aylmer"	per bottle	17c
Pineapple Crushed or Sliced	2 for	25c
Lemons, per doz	- - -	45c
Field Tomatoes, basket	-	30c

## Real Light On Russia.

So many conflicting reports to conditions in Soviet Russia have been given to the public in recent years, and it has been so difficult to distinguish in our minds what was propaganda either for or against the political and economic systems now prevailing in that vast country, that people have developed the habit of shrugging their shoulders when Russia is mentioned and refusing to place reliance in much that is told them. It was, therefore, with unusual interest that delegates to the World's Grain Conference at Regina listened to the first hand knowledge which was brought to them by E. J. Stirnimann, consulting engineer of Brooklyn, Iowa, who was employed by the Soviet Government for several years in connection with its gigantic plans for the mechanization of agriculture as part of its famous five-year plan.

Mr. Stirnimann had no political axe to grind, he had no propaganda to spread. He merely told an unvarnished story to the assembled world grain experts of the situation as he personally knew it to exist in Russia. And inasmuch as agricultural development in Russia cannot but have a direct effect on agriculture in Western Canada, it is of interest and value to have Mr. Stirnimann's first-hand information.

Quoting Litvinoff, Soviet Commissar of Foreign Relations, as stating at Geneva last June that "unemployment, wage cuts, and strikes were unknown in the land of the Soviet," Mr. Stirnimann commented that they were impossible in a country "where bread cards are granted only to the obedient worker." Control of the country's food supply precluded strikes, he said. There is no unemployment because the country's census takes no account of any but the workers—the unfortunate do not officially exist. There is no necessity for wage cuts for the money the government pays its workers has no value outside Russia. It is paper money and will not be honored for one nickel on a purchase abroad, or on a purchase of imported goods within Russia, Mr. Stirnimann explained.

Nevertheless there is wage-cutting in a sense, Mr. Stirnimann giving the following example: The Soviet Government floats government bonds each year, requiring each worker to turn back a part of his wages for bonds. In a fair job it amounts to a month's wages, which he could use for food. The worker feels this keenly but he does not complain.

Russian workers, he continued, by report always poverty stricken, as a whole today have the worst living conditions of any of the workers of their neighboring countries in Europe. The Russian could meet conditions in his pleading peasant life, but uprooted and the reserve supplies taken from him, he has no way to cope with winter's cold and the fearful winter hunger. The food supply available to Russian workers has fallen off in quantity steadily since 1928. Clothing, bedding and shoe supply are reduced to almost nothing. Housing has become more and more congested in the industrial and agricultural centres promoted by the Soviets.

Describing the system of farming, Mr. Stirnimann said farmers lived in villages going out to farm their own individual strips of land. Throwing the land into collective farms was only to obliterate the dividing lines by farming them in one unit. These collective farms were established before the State farms. The State farms were designed as models in each section for collectives and communes. Exorbitant taxes, no right to purchase, the possibility of fine as an enemy of the plan, and the promise of machinery through the government on their collectives quickly brought 90 per cent. of the farmers into collectives in the great drives of 1930 and 1931.

A Soviet State farm is never an independent farm in the western world sense. It remains only the link in a vast network of farms, with Moscow as the centre from which emanates all plans, orders and supplies. The man directing these farms is not often an agriculturist nor even an engineer; the entire crop is wheat.

State farms are under the direction of a resident farm superintendent. He has several assistants, all with offices and residences in the main settlements. There are directors of the institute, the experimental station, and of grain production. Each of these have further assistants, the number ever growing without end. All were specialists and did no manual labor. The administrative class grows larger and the working class relatively smaller. More and more offices are required and more desks to put in them. The working class gains recruits from only the more remote districts and in the seasons of intensive work the women are brought in as "pinch hitters." Now in 1933, it has become necessary to drive the office class back to the farm.

Describing how everything is centralized in Moscow, how even a practical director of a State farm had to wait for orders to begin an operation on his farm that he knew was long overdue, but which, although controlling perhaps thousands of workers, he had no right to start without definite orders from Moscow, Mr. Stirnimann said:

"One question looms large in looking over the situation in this modern dictatorship. How did the government get control over a vast country and over the destinies of a conglomerate people? The answer is simple; She got control of the food supply. Why should any people's government need to hold its people by such a strong lead? Because the government is of the minority party, representing five to seven per cent. of the entire population. Then one wonders why do not more Russians join the Communist party and share the privileges which attend the 'party membership' in Russia today? The answer is that it is made very difficult for a Russian to join the Party, and of late only the children of Communists are allowed to join."

Everything, down to the smallest detail, is dictated from Moscow, and control maintained through a collection of fines, taxes and shares of crop. There is never any lessening of centralization by any such name in official circles. It is always neatly explained as an increasing of power in some particular field. This brings us to a very important consideration in a government dominated by five to seven per cent. of the population and it is this Party Men must be kept in all the major agricultural posts, regardless of ability among 'comrades' because in these officials lies the power to control food, production, farming methods, all expenditure, education of the worker and his family. Thus it is the concern of the government in appointing men to these chief posts that they are 'safe' and 'good party men.' That is the reason why Communists insist that 'politics and farm engineering cannot be separated.'

## Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but it also tones and strengthens the system and braces up the system.

Never be without a bottle of Dr. Fowler's. Always prepared in case of emergency.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

## Grain Deterioration

Saskatchewan Research Workers Develop Method For Treating Damp Wheat

The practical value of the World's Grain Exhibition and Conference is revealed again in addresses contributed to discussion at the conference side of this mammoth gathering by Dr. R. K. Larmour, J. S. Clayton, and C. L. Wrenshall, of the laboratories of the University of Saskatchewan. These men have been experimenting with wet wheat, with a view to eliminating the development of heat and consequent deterioration of the grain before it reaches the driers at the head of the lakes.

Indue rain seasons have not been a common thing in the agricultural life of prairie farmers in recent years, and yet on occasions we get protracted rainy spells that carry a real threat to cut grain. The three Saskatchewan scientists mentioned have developed a vapor called toluene, that is held to be not inflammable in the slightest and that carries no danger to the quality of grain, but that yet effectively prevents damage from heat, mustiness and fungi in the grain consequent upon wet weather.

This would seem to represent a distinct advance in agricultural science, and that Saskatchewan men have been able to reproduce this treatment and impart it to the World's Grain Conference will be a matter of satisfaction to all citizens of this province.—Regina Leader-Post.

## Maxims Of His Majesty

Rules For Life Conduct In Workroom At Buckingham Palace

An English journal in its current issue gives favorite quotations of celebrated people and shows quite clearly who made them and women whose names and deeds are known through the world fortify their lives by recalling great sayings and sentiments. This list of great people is headed by His Majesty King George and his list of quotations is worthy of being reproduced for its own sake as well as for the eminence of the one who uses it. These sentiments that hang in his workroom at Buckingham Place read:

Teach me to be obedient to the rules of the game.  
Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.  
Teach me neither to proffer nor to receive cheap praise.  
If I am called upon to suffer, let me do it like a wise and bold soul that goes away without a murmur.  
Teach me to win if I may; if I may not, teach me to be a good loser.  
Teach me neither to cry for the moon, nor to cry over spilled milk.

There is a fine philosophy of life in these various maxims. Their reading makes one to understand better the wisdom and restraint and good sense and understanding usefulness of King George during his reign. Humble folk fighting life's daily battles may find some inspiration in these maxims. They are here given to that end.—Regina Leader-Post.

## Round Up Criminals

International Organization Formed To Conduct Out On Crooks

Police of several nations organized recently in Chicago the "international world police" to chase the criminal from his haunts over the globe.

The new international organization was formed at a meeting of Canadian, American and European police officials attending conferences sponsored by Baron Collier, special deputy police commissioner of New York, the international police conference, and the international association of chiefs of police. Winnipeg was represented by Chief Chris H. New-ton.

## Frater Native Workers

Many thousand foreign residents in Canada are affected by a new law stipulating that 95 per cent. of the factory and office workers must be of Canadian nationality. Many will have to leave the country to seek work elsewhere. If the foreigner has been in the country 10 years, or is married to a Canadian, he will be counted as a Canadian, and he will be exempt if he is performing duties for which a native is unskilled.

## Club Will Be Exclusive

Aviators who have crossed the north Atlantic alone are going to form a club. Plans for the organization were discussed by Amelia Earhart Putnam and her house guest, Captain James A. Mollison. They broached the idea to Wiley Post, world solo flier, who expressed approval. Col. Charles A. Lindbergh and Jimmie Mattern, the other eligibles, will be invited to join.

London hatters recently gave to charity 2,000 old hats left by customers.

Commodity prices in the Netherlands are rising.

**Best Quality  
Shaving Brush  
FREE  
for  
POKER HANDS**

Shaving is a real pleasure with a fine quality shaving brush like this one... bristles set in rubber... a gift you'll surely appreciate and use. Given in exchange for only 5 complete sets of Turret Poker Hands.

One 20c package of Turret Fine Cut will prove the quality and economy of this mellow, cool Virginia cigarette tobacco. You can roll at least 50 cigarettes from one package... and cigarettes of sweet Virginia fragrance and flavour... supremely satisfying.

## Recipes For This Week

(By Betty Barclay)

## STUFFED TOMATO SURPRISE

(Serves 6)  
6 medium size tomatoes.  
1 tablespoon gelatine.  
2 tablespoons cold water.  
1/2 cup orange juice.  
1/4 cup boiling water.  
1/4 cup orange juice.  
1/4 cup shrimp.  
1/4 cup diced celery.  
Mayonnaise.  
Mint sprigs (or stuffed olives or pimento).  
Lettuce.

Peel tomatoes and remove centres. Invert and chill. Soak gelatine in cold water 5 minutes. Add boiling water. Stir well. Add lemon and orange juice. Pour into a pan of the right size to make a gelatine layer 1/2 to 3/4 inch thick. Chill until jelly is solid. Cut in cubes. Half fill tomato shells with shrimp and celery pieces with mayonnaise. Then pile shells as full as possible with lemon jelly cubes. Garnish with mayonnaise, which may be colored green with spinach juice or vegetable coloring if desired. Decorate with mint sprigs, stuffed olive slices or pimento. Serve very cold in lettuce cups.

## BRAN DELIGHTS

1/2 cups sifted flour.  
1/2 teaspoons combination baking powder.  
1/2 teaspoon salt.  
1/2 tablespoon grated orange rind.  
1/2 cup butter or other shortening.  
1 cup sugar.  
1 egg, well beaten.  
1 tablespoon milk.  
1 tablespoon orange juice.  
1/2 cups bran flakes with other parts of wheat.

Sift flour once, measure and sift again. Add powdered sugar and sift again. Add orange rind to butter and cream thoroughly. Add sugar gradually and cream together until light and fluffy. Add egg, milk, and orange juice, beating well. Add flour; then add flakes and mix thoroughly. Chill until firm enough to roll. Roll 1/4 inch thick on lightly floured board. Cut in desired shapes and bake on ungreased baking sheet in hot oven (425 degrees Fahrenheit) 5 to 10 minutes. Makes 4 dozen cookies.

## Hourly Nursing Service

New Departure In Nursing Is Established At Edmonton

To meet prevalent conditions, and following along lines of nursing organizations in other cities, the Edmonton Graduate Nurses' Association has organized an hourly nursing service in connection with the graduate nurses' registry.

Hourly nursing means that patients may secure skilled nursing care in the home for stated periods as they find necessary to comply with medical care. This form of nursing is similar to visiting nursing, except that hourly nursing is paid for on a time basis rather than on a visit basis.

The Graduate Nurses' Association is anxious to establish hourly nursing and is fortunate in establishing it under the graduate nurses' registry. The patient, nurse and community are in a position to benefit from an organized nursing service. This nursing service, in whatever capacity it is administered, will be with the cooperation of the medical profession.

Commodity prices in the Netherlands are rising.

## Vimy Ridge Memorial

Undertaking Which Is Not Yet Completed, Is Massive In Conception

The memorial on Vimy Ridge, which four Canadian divisions and the Thirteenth British Brigade of West Kent and Scots stormed in April, 1917, is not yet completed fifteen years after the Armistice. But it is an undertaking massive in conception, on 240 acres 200 feet above the Douai Plain, and designed to be worthy of a victory of which Sir Douglas Haig said: "The capture of the renowned Vimy Ridge is an achievement of the highest order and of which Canada may well be proud."

It was fitting that the sculptor should be a Canadian, Walter S. Allward, who won an award that was open to the British Empire. Since 1925 he has been engaged on the work in a London studio. "All the time," says he, "I have sought to avoid any semblance of drum-beating." Canada mourns her dead in the war I have endeavoured to do in the Mother Spirit which stands with its broad base on the wall, breaching over the plain on which her sons fell. "Sorrow but not vainglory is there."

Blocks of from twenty to twenty-five feet high, and they were found in an old Roman quarry in Yugoslavia, from which the stone to build the Palace of Diocletian in Spalato in the third century was taken.

The common cause of France and Canada is to be represented by twin pylons 138 feet high. Below them will be seen the Spirit of Sacrifice in twenty heroic figures grouped at the ends of a wall 237 feet long, the base of the memorial. Surmounting the pylons will appear in relief Peace, Justice, Truth and Knowledge. The design calls for the covering of mouths of guns along the base of olive branches and laurel. The memorial should be ready for dedication on Dominion Day next year. The approaches will be by avenues of pines grown in Canada and France.

In F. G. McFenzie's "Canada's Day In Story" may be read the breathless story of the capture of Vimy Ridge. A Canadian correspondent, he does justice to the part the men of Kent and Scotland played in that immortal feat of arms. The dedication would not be adequate without the presence of the commander of the troops engaged, Sir Julian Byng, Governor-General of Canada from 1921 to 1926—New York Times.

## Canadian Legion At Tokio

Structure Nearly Completed and Will Be Soon Ready For Occupancy

It is understood that work on the Canadian legion in Tokio is proceeding rapidly and that the structure will shortly be ready for the occupancy of Hon. Herbert Marler, Canadian minister to Japan. While no official statement has been given out by the government, it is learned that Mr. Marler, on the occasion of his last visit to Ottawa, urged upon the government the advisability of going ahead with the legion construction so that advantage might be taken of the low costs of labor and materials.

The only opposition to the scheme was the scarcity of money for embarking on such a project which could not be described as absolutely essential. Long term financing was arranged, however, and the work has been in progress some time. It is expected a statement will be issued by the government shortly.

The low cost of labor and materials has a hundred uses. Always have a box in the kitchen.

## A Genius For Organizing

Lord Of Thousand Ships Was Millionaire At Thirty-Nine

One of the reasons why the "sun never sets on the British flag" was the organizing genius of Sir John Ellerman, son of a German bookkeeper. Sir John died recently in France, but in a hundred ports from Southampton to Sydney, his flag is flying on the ships which keep Britain first in the seas.

It was quite appropriate that Ellerman, the ship owner, should be the wealthiest man in Britain, whose life and prosperity depend upon sea-borne commerce. A few years back when many values had not been paid for what they have today. Sir John's wealth was estimated at from \$100,000,000 to \$200,000,000. That put him far ahead of the other British and in the Henry Ford and Rockefeller class. Even today the thrifty British are calculating that the nation will collect \$67,000,000 in death duties.

The Ellerman career, like that of Sir Thomas Lipton, proved that the art of being a self-made man bears no American patent. Ellerman rose from the humble place of black-coated English clerk in a shipping office. By 39 he was a millionaire. By 50 he owned one-eighth of all the British shipping.

He was frugal in a nation where somewhat free spending is the tradition of the wealthy. He never owned a yacht or a racing stable. It was said in his day that he never spent more than 5 per cent. of a year's income. The rest went into ships and more ships. He had a large chain of London and now-a-days, at one time his newspaper holdings rivaled those of Northcliffe. But Ellerman never shared Arthur Harmsworth's passion for political influence. He was content to collect the dividends and let the other men advise the cabinet.

## Move Settlers North

Settlers In Drought Stricken Areas Of Southern Alberta To Go North

The Alberta government and the railways have agreed to share the costs of moving about 150 settlers from drought-stricken areas in southern Alberta, and only decision of the Dominion government as to its share in the project is awaited, according to Hon. George Headley, Alberta minister of agriculture.

The settlers will be moved to more favorable areas in northern Alberta.

## Barley As A Food

Mentioned in Exodus 9:31, and in other books of the Bible, barley was one of the most important foods of the human race for thousands of years. Barley meal, as barley meal is called in Scotland, forms a favorite dish of porridge at the present day.

In the opinion of a dentist, soldiers make the best patients. They are thoroughly accustomed to drilling.

## United States And European Radio Programs To Be Heard Over Canadian Stations

Canadian radio listeners will hear over Canadian stations outstanding United States and European radio programmes as a result of arrangements completed between the Canadian radio broadcasting commission and the big broadcasting companies of United States—National Broadcasting Company and the Columbia broadcasting system.

These arrangements were concluded in New York by Thomas Maher, vice-chairman of the commission, in return for the American programmes, which are to be supplied to the commission for its national network, the commission is to supply the American companies with some of its popular programmes for broadcasting throughout United States. Announcement of the arrangement was made Friday by the commission.

From time to come to the commission from the United States include grand operas from the Metropolitan Opera House, New York, and the concerts of the New York Philharmonic orchestra. The American broadcasting companies are also to supply programmes of their own creation in which famous singers and orchestras will be employed.

In addition to supplying the commission with American programmes, the United States broadcasting companies are to make available to the commission the broadcasts of important events and other features which they bring across the Atlantic from Great Britain and the continent.

As the programmes will be carried on the commission network to stations in all parts of Canada, reception difficulties in connection with these will be overcome.

The exchange of programmes is a co-operative step and is without cost to the commission.

The United States end of the exchange will commence about October 1.

### Over Twelve Million Chinese Living Abroad

#### Population In Canada Is Given As Forty-Five Thousand

Chinese agitators against the so-called foreign imperialists never tell their listeners the magnitude of China's communities in other countries. However, the Chinese overseas affairs commission announces that 12,786,172 of their people reside in the United States and elsewhere beyond China.

Out of 22 nations or groups of nations listed, the United States ranks fourteenth in number of Chinese residents, the total being 74,954.

Burma ranks well ahead with 3,450,000 Chinese, while Siam with 2,500,000 is second and Japan is third with 2,000,000. In Dutch East Indies there are 1,233,856, in Korea 915,000, in Hong Kong 825,845, in Indo-China 480,000, in Formosa 340,000, in Soviet Russia 300,000.

Mexico, which is rapidly becoming the graveyard of Chinese settlers, is listed as having 120,000 and ranks tenth in the list. However, hundreds of Chinese have just arrived back in China and more are to follow.

Macao, Cuba and the West Indies and the Philippines rank just ahead of the United States in Chinese residents. Following thereafter in decreasing proportions come Australia and the South Seas Islands, Canada and the United States, Peru and Latin America, Hong Kong, Japan with 25,988, South Africa, Panama and Central America with 25,000 and Europe with but 1,600 Chinese.

#### Speedy Results

A young man who had suddenly inherited a fortune decided to learn how to carry himself in society. He went to a school of deportment, and a big Frenchman begged him to enter.

"Do you give lessons in deportment?" inquired the young man.

"The best, m'sieu!" gushed the proprietor. "My system sets perfect. Two weeks ago a young man—like you, m'sieu—take only three of my lessons in deportment—and yesterday he was deported."

Bobby (looking up from his book): "Is oxygen what oxen breathe all day?"

Father: "Of course, and what every other animal and person breathes."

Bobby: "And is nitrogen what everyone breathes at night?"

About 2,500 factory operations are necessary to produce accurate dependable rifles.

### Start Novel Campaign

#### Women's Council Of Britain Advo-cates Man Teachers For Boys

The women's council of Britain was the main of the future better guided at school than they want to do it. In fact this body is in revolt against women teachers for boys. A women's council has been formed with the Countess of Oxford as president, and Dame Madge Kendall, Miss Marjorie Bowen, and others as members, to advocate masters for boys over the age of 8. The honorary secretary is Miss Marguerite Bennett, principal of the Crouch End College and high school, and she tells why this novel campaign had started.

"Our object is a simple one. We wish every boy to have every chance to develop his masculinity so that he may come into touch with a man. Such a lot of education is imitation and a man teacher is necessary for a boy when he is at his impressionable stage. A boy loses more than he can ever regain if he does not have a master before he is 11."

"We are organizing branch councils in the provinces," she said, "and will hold lectures and meetings and brief the members of education to make the alteration we desire. There are more than 1,000,000 boys in England today, between the ages of 8 and 11, who are being taught by women."

Braddon Sun.

### Our Canadian Population

#### Last Census Showed Comparatively Few Aliens In Dominion

Computations from the census of 1931, which are now being made available to the public refute the supposition that Canada is being—or has been—"over-run with foreigners." Of the 10,378,786 people found by the enumerators in Canada in that year, 9,254,091 were born in the Empire, and 8,069,261 of these were born in Canada itself.

It will be said, of course, that many of these were born of foreign parents. But the number is probably less than might be thought. Of the 10,376,786 residents only 1,659,095 were the offspring of two foreign parents, and only 970,522 were the offspring of one foreign parent and one Canadian.

It does not follow that these aliens are naturalized. Many have been naturalized.

The census, in fact, shows only 529,139 aliens in Canada, including Canadian and British subjects who have lost their Canadian nationality (by marriage to an alien husband, for example), and including also many immigrants of British stock who have come to Canada from the States.

Of these aliens, 438,446 were more than twenty years old. Many of them have been naturalized since the census was taken.

While the census men found 529,139 aliens in Canada, there are probably close to that number of Canadians who live abroad and are not included in the census at all. Of 1,278,421 persons of Canadian birth residing in the United States in 1930, 308,567 were classified as having retained their Canadian citizenship. No doubt a proportion of these have, since that time, returned to the Dominion.—Toronto Daily Star.

### The Real Pulling Power

#### No Better Means To Reach Public Than Through News

One of the things the depression years seem to have taught American business men is that the newspaper advertisement is surest and most effective means of reaching the consuming public.

Figures just made public by the Bureau of Advertising of the American Newspaper Publishers' Association show that newspapers received 59 per cent. of the total advertising appropriations of 432 national advertisers in 1932 and constituted the preferred advertising medium of 19 of the principal trade groups in the United States.

Newspapers for example got 82 per cent. of the automobile advertisements; 74 per cent. of the gasoline ads; 92 per cent. of the railroads ads and 87 per cent. of the shoe and clothing advertisements.

The figures are a remarkable tribute to the "pulling power" of the newspaper advertisement.

Two thousand unemployed men will gather potatoes in the Island of Jersey, England, this year.

A squeak detector for automobiles has been installed in one service station in Washington, D.C.

### THE SCULLING CHAMPION AND THE COVETED TROPHY

Ted Phelps of Great Britain, holder of the world's professional sculling championship, is shown standing beside the Charrington Cup, emblematic of the title. This trophy will be at stake when the British sculler and Bob Pearce, Australian star, now residing in Hamilton, Ontario, race at the Canadian National Exhibition this Fall.

### Something New In Oil Wells

#### Has Been Producing Pure Vaseline For Ten Years

A freak oil well which came in ten years ago as a producer of almost pure vaseline is still pumping the heavy golden substance and paying its owner at Lamar, Oklahoma, handsome returns.

Perhaps the only well of its kind in the world, the well is a marvel to veteran oil men, both as to the oil it produces and its life. Men who have followed the oil industry in many climates said they never have seen or heard of a similar well.

The well was drilled in at 3,710 feet on Jan. 26, 1925, for production estimated at 350 barrels a day. The "vaseline well" still produces around this amount and still is the only well in the area. Other drilling attempts have produced dry holes.

The strange kind of oil flowed over the derrick 200 feet when the well was drilled in. Dark green in color, the oil turned a brilliant golden yellow when it struck the outside air. Analysis showed it to be almost pure vaseline. It was so heavy that it hung from fences like the well-like gum.

Because of its thickness ordinary pipelines would not carry it. A special line, with a steam pipe to heat the almost solid lubricant, was used.

### New Guide For Airship

#### Pilot Can Leave Cockpit Without Endangering Craft Or Self

After two years of experiments, the "airubot," a compact box one foot square and weighing less than 30 pounds, has been perfected to take complete charge of an aeroplane after it hops off.

Encased in a metal box, the automatic pilot would guide the ship to any predetermined height, level or start on a charted course without a human pilot touching the controls.

Gyroscopically controlled and hydraulically operated, the device includes an automatic turn control, and automatic climb lever and a descent control. The human pilots can leave the cockpit for any length of time during actual flight without endangering the flight.

One of the airboats now is in use in a passenger aeroplane of the well-known air line. The machine averages 130 miles an hour on a transcontinental jaunt.

The device does not dispense with the services of the pilot or co-pilot. Pilots are required to take off and land the aeroplanes and to keep a close check on weather soundings.

### After Twenty-Two Years

#### Stolen In Edmonton, Alta., Ago. Detective-Sgt. Roy Perry recently recovered a watch in a Vancouver second-hand store.

Once before was the missing watch seen by police and that was on June 1, 1917, when it was recovered from an ex-convict. A short time later it disappeared and no trace of it was discovered until now.

The wings of a common house fly vibrate 330 times a second.

## Canadian Publisher Finds That Life Goes On In Russia Much The Same As In Canada

### Week In Civilization

#### Enough For Trapper

#### Makes No Apologies For Desire To Return To Northland

A week in civilization is enough for Ranger Jonson, one of the best known trappers in the far north. In Prince Albert recently on his annual jaunt into the land of automobiles and depression.

He left again for Big River, where he planned to push off his big canoe and paddle his way to his trapping grounds in the Hatchet Lake country, 400 miles from Flin Flon, Manitoba. He and his dog followed the waterways to Flin Flon from their northern home, supped the canoe to Big River, spent four days in Prince Albert, and then away again.

He was a visitor at Prince Albert last summer and promised to go back next year. Civilization has its attractions but the hardy trapper makes no apologies for his desire to get back to the land of trees and water.

Listening to his stories of experiences and looking at the wonderful collection of snapshots of outfit which he has taken of the scenic wonders of the northland makes that deer understandable.

He spoke lightly of carrying his canoe and equipment over mile portages necessitating seven trips back and forth or a total of 14 miles' walking. On the round trip, there are 60 of them, though only a few are that long.

A trader in the city stated that each year Jonson comes in with the largest catch from the north. In addition to that, he is what is known as a "clean" trapper; his stock is always in good shape on its arrival.

### Canadian Invents "Super-Eye"

#### Its Use Will Make Perfect Television Possible Is Claim

The invention of a "super-eye" which it is claimed will make perfect television possible, revolutionize the speed transmission of messages and motion pictures, and multiply a thousand-fold the power of telescopes, has been announced at Ottawa. The inventor is Dr. Francois C. Henrotteau, head of the astrophysical branch of the Dominion Observatory.

Dr. Henrotteau has been working for 10 years on an apparatus which he hoped would facilitate astral observation. It is stated that application of the apparatus to television had not been contemplated until his research disclosed the possibilities in that direction. Use of the photo-electric cell is said to be the basis of the invention which has been patented in the United States after a series of tests.

Dr. Henrotteau was the discoverer of the mysterious planet "X," which was at first thought to be the planet "X" discovered by the Lowell Observatory in Arizona.

### Retire Civil Servant

#### Order Passed To Retire Those Who Have Passed Age Of 65 Years

Pursuant to the government's efforts to reduce the cost of the public service by an amount estimated in the budget speech last March to reach \$14,000,000, the government in council passed an order providing for the retirement of civil servants who have reached or may reach the age of 65 years.

This is only one of the methods being adopted by the government in its economy efforts and the number of employees concerned is estimated at about 1,500 throughout Canada. Those retired will receive their sum annuity allowances as provided under statute, and if not contributors to any retirement fund, will be given bonuses amounting to one month's salary for each two years they have been in the service up to a maximum of six months' salary.

Experiments gained by the members in their different capacities has been placed before the inquiry, and some illuminating information relating to cases and treatment has been collected.

The London Daily Express carried a long interview with Robert Cromie, publisher of The Vancouver Sun, who has just returned from Russia where, he said, "life goes on just the same as it goes on in England or Canada or China. Once you get that thought in your mind, you get a new conception of Russia," he added.

The newspaper quoted Mr. Cromie as saying:

"I landed in Moscow on their Derby day, I saw 50,000 people at the horses races betting on the ponies just like they bet in England. They were having drinks and lunches, but of course, it was all on the Russian standard which is not Ascot by 20 lengths."

"But the spirit of the people was the same as any crowd in England or Canada. The tram cars of Russian cities are jammed with people. They are completing an underground system in Moscow in 1934. I saw a crowd of 50,000 well-mannered, enthusiastic people watching a football match in Moscow. That was an eye-opener to me."

### Studying Crime Impulse

#### Committee In London Seeking Its Causes and Cure

A secret inquiry is being conducted by a committee in London to deal with the problem of the "uncontrollable impulse" in its relation to crime.

The committee which has held several meetings, is composed of magistrates, business men, psychologists, medical men, a K.C., and a well-known "criminal" barrister.

When the investigation is completed a report will be sent to the Home Office with suggestions on a question that for years has baffled judges and doctors.

Questions relating to the treatment and punishment of offenders susceptible to "uncontrollable impulse" form the basis of the inquiry which is being conducted by men who have had opportunities of observing how it affects people in different walks of life.

Two points under consideration, for instance, are:

"How far, if at all, should a person be punished if an offence committed as a result of an uncontrollable impulse?" and "Can that impulse be checked in youth, or eradicated if allowed to persist?"

The investigation which it is believed, may prove of considerable importance in criminal jurisprudence, developed on the subject of kleptomania.

A woman in high social position was charged with stealing from a London store, and the plea of "uncontrollable impulse" was raised in mitigation.

The activities of the committee, however, are not limited to considering the problem as it affects shoplifting. They realize that while the impulse takes that form in one case, there is a great variety of forms — many of them leading to very serious offences.

Experiments gained by the members in their different capacities has been placed before the inquiry, and some illuminating information relating to cases and treatment has been collected.

### Carrots Good For Cattle

#### Benefit Shown In Heavy and Gassy Cattle

Experiments of some Chicago experts for several years have proven that the lovely carrot, favorite food of rabbits, is one of the best internal hair tonics yet discovered.

The vegetable's beneficial effects was first noticed when cattle were fed on carrots. Their coats became heavy and glossy.

Experts experimented on humans, and declare the carrot diet causes noticeable improvement, but that it does not equal that of animals.

Sixteenth century apothecaries made oil out of earthworms as a ruling remedy for rheumatism.

Londoners borrowed 10,000,000 novels from public libraries in the last year.

Now the three Rs are rouge, rum and runabout.

## WORLD HAPPENINGS BRIEFLY TOLD

It has been officially announced at Ottawa, Monday, October 9, would be the national Thanksgiving Day for Canada.

Henry Ford recently passed his 70th milestone, in excellent health and so engrossed with many interests that he had no time think of such things as retiring.

Chesterbourg has opened a \$2,500,000 maritime station, 920 feet long and 138 feet wide, in which Paris-bound travellers will be transferred from ships to special trains.

C. Barclay Drummond, vice-president of the Mechanical Equipment Company, died recently in Montreal, after a long illness. He was 38 years old and a son of the late Dr. William Henry Drummond, the noted poet.

East Coule miners of the Drumheller Valley coal fields, on strike against wage reductions for three months, demanded 18 per cent. salary increases. Five mines are affected by the strike.

Thirty-three thousand three hundred and seven sheep, 22,871 cattle, 162,248 hogs, and 32 calves were shipped from western to eastern Canada during the first 24 weeks of this year.

Nelson's personal log book has been handed over by Prime Minister Ramsay MacDonald to Sir George Hill, director and principal librarian of the British Museum. The entries in the book are in the admiral's hand.

The mobilization of Mexico's resources for rehabilitation of its economic life through a six-year program has begun under the command of General Plutarco Elias Calles, the "iron man" and former president of Mexico.

Columbia revenues for the first quarter of the present fiscal year were \$60,000 greater than for the corresponding period last year, stated Hon. J. W. Jones, Minister of Finance. Receipts were \$5,810,000, compared with \$5,750,000.

The first carload of new wheat from Manitoba was loaded at the elevators at Gretna, Man., with wheat from the farm of D. Klassen. The grain was an excellent sample, grading No. 1 hard and indicated a yield of 16 bushels to the acre.

### Test H.B. Route

#### Will Investigate High Insurance and Cargo Rates

The Federal Government is prepared to consider the feasibility of tests by Canadian government vessels of the Hudson Bay route before the present accepted season and after the season, it is indicated by Edward Evans manager of the Southern Saskatchewan stock yards at Moose Jaw. The suggestion is the result of the recent Saskatchewan stock growers conference and its purpose is to determine the justice or otherwise of existing high insurance and cargo rates. Mr. Evans has received notification that an official of the Federal Department of Trade and Commerce will shortly come to Saskatchewan to discuss the proposal.

#### New Law Has Precedent

#### Death Penalty For Kidnappers In Year 1665

If New York state legislators decide to enact a law providing the death penalty for kidnappers, as has been urged, they will have precedent in the colony of New England, where a law of that kind is dear to the legal mind.

On March 1, 1665—260 years ago—were promulgated the Duke of York's laws which named 12 offenses for which the death penalty was inflicted. One of them was kidnapping. It read: "If any person forcibly stealth or carrieth away any man or mankind, shall be put to death."

#### Avalanche Victims Found

With the melting of the snow on the Swiss Alps site of 13 avalanche victims have been found 7,500 feet above Locarno. The 13 were smuggling sugar and coffee across the frontier when the avalanche swept them from a pass and buried them under snow, ice and rock 3,000 feet below. Search for the remaining seven is being continued.

#### Not All Superstitious

A ten-minute checkup on the person trying to negotiate a ladder set up on the sidewalk in Sacramento, California, was as follows: Of the forty-six women passing, thirty-four walked around and thirty-eight of the sixty-nine men did the same. Twenty-three men and twelve women walked under. Possibly some didn't want to be hit with a brick—or a gavel of pain!

## Work Of Banking Commission

### Monetary System One Of Many Things To Be Studied

The terms of reference under which a banking commission of Lord McMillan, Premier Brownie of Alberta, and Beaury Leman, of the Banque Canadienne Nationale, Montreal, will inquire into the act's operations are:

It is desirable that the approaching periodic revision of the Bank Act shall be based on a complete and detailed examination of the provisions of the act and of the actual operation of the banking system.

It is also desirable that such examination should include a study of the facilities now afforded by the Finance Act and a careful consideration of the advisability of establishing a central banking institution, and, if so established, of the relation of such central bank to existing banks and its proper authority and function to the operation of the banking system.

That such examination should also include a study of the entire monetary system of Canada, including credit, currency and coinage, particularly in their relation to commodity price movements and fluctuations in international exchange:

It is also advisable to consider whether in and what respects the banking institutions and the monetary system of Canada may be modified, extended or developed for the purpose of facilitating inter-imperial and international co-operation in public policies designed to promote the revival of domestic and foreign trade and enterprise and the general increase of employment and to insure a greater measure of stability in respect thereto.

BY RUTH ROGERS

Manitoba Institution Devoted To The Educational and Aesthetic Development Of Young Canadian Womanhood

Attended by success from its inception, Riverbend Schools for Girls, Winnipeg, will continue its work as a boarding and day school for girls with the reopening in September, according to the prospectus just off the press. A hundred per cent academic record was again maintained when the 1933 results of the departmental examinations appeared in July, a result of the efforts of the teaching staff under the principality of Miss Joan M. V. Foster, M.A., and to the dual advantages of individual development and small classes, with consequent individual attention to the pupils.

The school was established in September, 1929, under the auspices of the United Church of Canada, starting with one building, the home of the late Sir James Alton, bequeathed to the church for the purpose of giving western Canada one more cultural institution to meet a specific need of the people. The first year a new building, to be used as a main school, was erected and the present group of three imposing buildings includes the kindergarten and a classroom subject.

Especial emphasis, explains Miss Foster, is placed on those subjects which are most important from a cultural point of view such as art for example, English, French, music, the teaching of French, including conversation at meals, a French club, and other extra-curricular activities which enable to make something more than a classroom subject.

From a graduate of the Margaret Eaton School of Physical Education, students of Riverbend are given an introduction to the great indoor and outdoor sports of well-rounded living.

Identified as the school of the Assinibine River, the school, capable of accommodating 190 pupils and with an attendance in 1933 of 120, is located between 12th and 15th Streets, covering both day and boarding students, Riverbend with its large, airy, well-lighted rooms, providing model class rooms, gymnasium, music room, and dining hall, supplies a school library of "home" of the highest standard.

Many names prominent in the social and church life of the west appear on the roll of the school's advisory committee: Mrs. E. C. Harte, chancery of Government House, and Mrs. John Bracken, wife of the provincial premier; Mrs. C. G. Moore, Moose Jaw; Mrs. Robert Forde, Pipestone; Mrs. C. Adams, Calgary; Mrs. A. E. Laird, Yorkton; Mrs. R. C. Wallace, Brandon; Mrs. J. E. Brewster, Edmonton; Mrs. W. G. May, Saskatoon; Mrs. T. A. Neelin, Brandon; Mr. Douglas J. Thorne, Regina; Mrs. A. M. Scott, Calgary; Miss Alice Beattie Wilson, B.A., Toronto in Scripture and Mathematics; Miss Mary E. White, M.A., of Oxford and Queen's, in Latin and Marital Science; Dr. E. B. of Dulhousie in Science and Mathematics; Miss Florence F. R. Mews, of the Margaret Eaton School in Physical Education; Mrs. Dorothy M. M. Cole, of the Agricultural College, as house manager.

In the junior school, presided over by Miss Laura Cull, are Miss Sadie M. Gregory, B.A., of Manitoba Uni-

versity, and Mrs. D. Watt.

**Preventing Barn Fires**

### Adequate Use Of Salt Retards And Prevents Spontaneous Combustion

The Ontario Fire Marshals' records show that more barns are destroyed by fire originating from spontaneous combustion in hay than from any other cause except lightning in unrodded barns.

Harvest weather conditions in 1932 were as dangerous as more barn fires than ever were expected. Instead there were 278 fewer barns burned in Ontario and a decrease of 17 per cent. in the number of fires known to be caused by spontaneous combustion.

Credit for this is given to the more general use of salt. The adequate use of salt is the most certain way of retarding and preventing spontaneous ignition fires.

Sweden is buying more American low-priced passenger automobiles than in 1932.

Australia's wool clip is estimated at 2,942,500 pounds.

**Danger Spots For Pedestrians**

### Five Are Listed For Guidance Of Careless Walker

Five principal danger spots lurk in traffic for the unwary pedestrian, according to an analysis of accident reports. A large proportion of traffic accidents involve persons on foot and the circumstances listed in the order of their frequency are: Crossing the street between intersections; crossing at intersections; coming into the street from behind parked cars; walking on or along rural highways, particularly when failing to walk facing oncoming traffic; and children playing in the street.

### Duty On Melons

The value for duty purposes on can-

taloupes, muskmelons, honey balls,

casabas and honey dews, from Aug-

ust 1 to October 31, has been fixed at

four cents per pound, an announce-

ment of the Department of National

Revenue says. This valuation applies

to these fruits entering Canada under

the intermediate or general tariff.

**Canada's Hospitals**

How well equipped the great ma-

jority of Canadian hospitals are is

proved by the fact that out of the

883 given as the total, no fewer than

448 maintain their own X-ray de-

partments, while 234 have their

own clinical laboratories and 218 their

physical therapy departments.

John Dwyer, who died recently in

Thurles, Ireland Free State, aged 90,

was blind from early youth, but de-

veloped so fine a sense of touch that

he could repair watches and clocks.

Egypt's imports of leather have

declined 80 per cent. in the last four

years.

the money. Buy the  $\frac{1}{2}$ -lb. plug  
and you save still more.

## SUNDAY SCHOOL LESSON

AUGUST 13

HANNAH

Golden Text: "A woman that feareth not Jehovah, she shall be praised."—Proverbs 31:30.

Lesson: I Samuel, Chapters 1, 2.

Devotional Reading: Psalm 123.

Explanations and Comments

Hannah's Prayer For Her Son, Chapter 1:11—Hannah and Elkanah, her husband, went regularly every year to the temple at Shiloh, there to worship and offer sacrifice, one of the great religious feasts, probably the Feast of Ingathering, or Feasts of Tabernacles, which was held after the harvest was over. The tabernacle in the temple was the tabernacle. The temple was not built until about a hundred years afterwards.

As was customary, after a portion of the service, Hannah was born at the altar, and another portion had been given to the priests, the family partook of the rest within the sanctuary precincts. But Hannah, her heart full of thanksgiving, had given all to God, and regretfully, every year, had nothing left with that of Peninnah, Elkanah's other wife, who was blessed with many more children. After the mass was over, she presented herself in the temple to pray to Jehovah. Her prayer was accompanied by many tears, as she knelt before her face to God, and wept bitterly. When her son, if Jehovah would bless her with a son, she would consecrate him all the days of his life to Jehovah.

"Hannah prayed for a child from God, and she sought him back to God. Praying for gifts that we may give them back to God has it in a high and noble motive. Do you pray to God for a child? If so, when never you ruin. Do you pray for success in your life-work, that you may lay it at the feet of Jesus? If so, the largest success will be a blessing."

A. C. Dixon

Hannah also declared that the child should be a Nazarite, one set apart to God, of whom she had never heard.

Elkanah, the school master, under a board of governors, was appointed a teacher.

In the junior school, presided over by Miss Laura Cull, are Miss Sadie M. Gregory, B.A., of Manitoba Uni-

versity, and Mrs. D. Watt.

**Prompt and Efficient**

### Member Of Detroit Automobile Club Tells Good Story

Depression or no depression, some American organizations continue to give prompt and efficient service.

Take the case of the Detroit Automobile Club. A friend of ours who is a member of it thus writes:

"I had a little car smash recently, and was compelled to pay a heavy bill to two lawyers demanding that I pay \$225 for damages to the other car.

At 11 I felt the accident was not my fault, I sent the letter to the automobile club, and the next day both lawyers were struck by lightning.

Personally, I think that is carrying things too far, but I suppose the automobile club knows what it is doing."

—London Advertiser.

### Music That Endures

#### Old Composers' Work Outlasts Modern Song-Makers

The mechanics of music has re-

duced a song hits popularity to about

three months, a society of composers and publishers complains. So the old order changeth! A composer's problem used to be to get a hearing for his song. Now he has to figure out a way to prevent it from being heard too much.

Still, those three B's—Bach, Beeth-

oven and Brahms—seem able to gain

something more than contempt from

the familiarity offered by the radio.

It's the writers of blues that are blue.

—Christian Science Monitor.

### Cannot Be Classified

Two fishermen have caught a marine monster that defies classification at Tacoma, Washington. The strange creature has the head and body of a reptile and the gills and fins of a fish.

Powerful jaws enclose fangs nearly an inch long. The body is large and muscular for about 18 inches behind the head, then tapers off rapidly into a dark scaleless, reptile-like tail five feet in length.

### Source Of Supply

Teacher—"What are the products of the West Indies?"

Boy—"I don't know."

Teacher—"Come, come! Where do you get sugar from?"

Boy—"We borrow it from next door."

## TO MAKE CAREFUL INVESTIGATION OF BANKING SYSTEM

Quebec, Que.—A careful and business-like study of Canada's banking and credit system is the aim of Lord Macmillan, who arrived from London on the liner "Empress of Britain," to head the royal commission recently appointed for that purpose.

"We want to do something really useful for Canada," said the author of the Macmillan report, made three years ago on the similar problem in England. "We are taking this very seriously and we need the goodwill of the Canadian people to make it a success."

Lord Macmillan is making his fourth trip to Canada in seven years and is no stranger to Canada. "I am practically a Canadian," he said. "I sit on the privy council on many Canadian appeals and on my first visit to Canada I was counsel for Canada in the Labrador boundary case."

Sir Charles Addis, the other English member of the commission, was also on board the "Empress" and expressed himself as keenly interested in the case ahead of him. Both Lady Macmillan and Lady Addis accompanied their husbands.

A few lord advocates of Scotland, Lord Macmillan proved to be a most affable and friendly personage and humorously described himself as an "terra man." In Scotland, he said, "we call an odd job person an 'terra man,' and that's what I am. I am not an expert banker and this is really a side line."

There will be only five members on the commission, the Canadian members being Sir Thomas White, former minister of finance; Hon. J. E. Browne, Premier of Alberta, and Beaury Leman, president of La Banque Canadienne Nationale.

He expects to complete the inquiry within two months but the report may not be made to the government until later in the year.

The report of the commission will form the basis for the decennial revision of the Canadian Bank Act, which was due last session of parliament but was postponed one year in order that this inquiry might be instituted.

All important business centres will be visited by the commission and those who have anything to contribute to the success of the inquiry will be given a hearing. The concluding session will be held in Ottawa.

## Wheat Pool Payment

### Further Payment May Be Made In Alberta

Edmonton, Alberta.—Possibility exists a further payment may be made to wheat pool members on the 1930 crop if present increased wheat prices continue, according to Premier J. E. Brownlee of Alberta.

Mr. Brownlee said the pool, which handled the crop under the guidance of John I. McFarland, of Winnipeg, may show a profit due to wheat prices' jump recently. "There would seem to be good reason for using such profits by way of partial equalization, at least, of payments on the 1930 crop," the Alberta premier added.

## Bank Act Inquiry

### Is Expected To Be Completed Early In October

Edmonton, Alberta.—Inquiry into operations of the Bank Act by the royal commission, announced by the Dominion government, is expected to be completed early in October, according to Premier J. E. Brownlee of Alberta, selected as a member of the commission.

Mr. Brownlee revealed Prime Minister R. B. Bennett had invited him to join the commission before the Canadian government head left for London to attend the world economic conference.

## War On Kidnapping

### President Roosevelt Maps Out Plan To Control Menace

Hyde Park, N.Y.—President Roosevelt mapped a war against kidnapping and racketeering with his intimate adviser, Raymond Moley, an authority on crime, and scanned every available federal statute to aid an immediate campaign.

To beat down kidnapping he is counting on a super police force, already in organization and at work, to co-operate with state authorities.

## Lean Easily Subscribed

### Fine Reception Accorded Canadian Loan On London Market

London, Eng.—The most optimistic expectations were borne out when the lists for the new Canadian loan of £15,000,000 were closed directly after they had been opened.

It was understood, although not officially announced, that the first mail of the day had brought a substantial over-subscription.

The enthusiastic reception accorded the first Canadian loan on the London money market in 20 years was fully up to the welcoming comments of financial authorities after announcement of the loan last week, summed up by financial correspondents of the daily newspapers called today "Canada's day."

Success of the loan will promote the financial re-organization between London and Ottawa, "which is necessary if the policy of last week's empire declaration is to be made effective," said the Times.

That declaration called for closer financial relationships with stability of exchanges and directly preceded the re-entry of the Dominions into the London loan market.

Todays loan was in four per cent bonds, sold at par and with no discount for cash, in 20 and 25 years issues. The proceeds will go outside the empire, but it is understood they will be used to pay unconverted victory bonds of 5½ per cent redeemable this fall.

## Blames Newspapers

### Code Of Ethics Needed In Treatment Of Crime News

Chicago.—A special code of ethics for treatment of crime news by newspapers as an aid to law enforcement officials was suggested by Malcolm W. Browne, editorial director of the Detroit Free Press.

Addressing the International Association of Chiefs of Police, Bingay placed partial responsibility for the rise of the gangster upon what he termed the "sensational, irresponsible and scandal mongering element of the press."

The element, he declared, had served as publicity agent for the criminal.

## Make Heavy Payment

### Saskatchewan Pool Elevator Issue Cheque For Large Amount

Regina, Sask.—The Saskatchewan Pool Elevators recently paid \$1,454,610 to the liquidators of the Saskatchewan Co-Operative Elevator Company, to the purchase price of 1926.

With the exception of a payment on a mortgage to the Saskatchewan provincial government of \$597,590 plus interest, which is to be paid at the end of this month, the entire liability has disappeared from the books of the pool.

The purchase price of all the assets in 1926 was \$11,061,269.

## Scouts' Fourth Jamboree

### Lord Baden-Powell Present At Gathering In Hungary

Godo, Hungary.—The fourth world jamboree of Boy Scouts started with the parade of 30,000 boys past Admiral Nicholas North, regent of Hungary.

A telegram arrived from the Prince of Wales, thanking the Scouts for a greeting sent to him and wishing them success. Lord Baden-Powell, founder of the Scout movement, was present.

### Refuse To Aid Trotsky

Paris, France.—Leon Trotsky was reported to have failed in a desperate effort to get the Soviet foreign commissar, Maxim Litvinov, to help him return to Moscow. The exiled Russian revolutionary is sojourning with Mme. Trotsky near Royat, France. Litvinov, reports said, refused to help him.

### Mergers Better Than Combines

Toronto, Ont.—"The day must never come when we have a combine, but a merger is a different thing," Mayor W. J. Stewart of Toronto told the Funeral Service Association of Ontario in convention here. "If we have so many small establishments the public is called upon to share an overhead which is unfair."

### Freakish Lightning

Minden, Ont.—Perhaps lightning never strikes the same spot twice; but it comes pretty close to it. Five head of cattle on the farm of Dunn Gibbs were killed by lightning recently. Last autumn a large barn on the same farm was struck and burned to the ground.

## Frost Damages Wheat

### Will Be Used For Cattle Feed In Southern Alberta Area

Calgary, Alberta.—July frost attacks on the High River-Blackfoot area of Southern Alberta has injured 30,000 tons of wheat, which will now be used as cattle feed, it was revealed at a meeting of farmers and ranchers here.

The meeting, attended by Hon. George Hoadley, Alberta Minister of Agriculture, was held to ascertain feed conditions in the district.

Drought also has seriously affected the district and plans were being made to solve the feed problem this fall with the aid of the cabinet minister who declared there was grave danger cattle would be sacrificed by holders during the coming months unless something was done about the situation.

## Encounters Obstacles

### Dog Musher From The Pas May Not Reach Chicago Fair

Winnipeg, Manitoba.—Pat Campbell, famed northland dog musher, has almost given up hope of reaching the World's Fair at Chicago with his team of racing huskies.

Campbell, and two companions, mushed the 500-mile trail from The Pas to Winnipeg, arriving here 15 days ago. Since then he has been trying to arrange for entrance to the United States, and has appealed to Chicago fair officials for aid.

Immigration authorities demand a bond of \$200 each for Campbell and his aides and another bond of \$2 apiece for the seven dogs in his team.

## U. S. PRESIDENT APPROVES LARGE NAVAL PROGRAM

### Formal Opening May Be Postponed Until Next Season

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways and Canals, stated that formal opening of the port of Churchill will, in all probability, not take place until next year.

The president carefully analyzed the information received by the navy and the silos decided on by the commanders. His approval signalled an immediate start on work providing jobs for thousands in government and private shipyards.

Admiral William Standley, chief of naval operations, and Rear Admiral Emery Land, chief of construction, brought the naval construction program to the summer White House by seaplane.

Mr. Roosevelt talked the plans over with his naval chieftains and after giving his approval left with them the formal announcements of assignments of yards for construction of the ships.

The start of America's huge naval construction comes just after word from Japan of the start of a building program there.

Mr. Roosevelt's ship building plan comes after the public works program and is intended to give the American fleet the strength it is allowed under existing naval limitations agreements.

Both Republicans and Democrats in congress have urged that the American fleet be built up to the terms allowed by the London agreement.

About \$46,000,000 is to be expended this year and a total of \$238,000,000 over three years.

### BRITAIN'S AIR MINISTER BECOMES A PILOT

Lord Londonderry, British Secretary of State for Air, evidently believes in practising what he preaches. Two weeks ago he gained his "A" certificate for flying and a week previous his second daughter, Lady Margaret Stewart, also qualified for her "A" certificate. Lord Londonderry's youngest daughter, Lady Mary Stewart, who is not yet 13, is rapidly becoming an accomplished flyer. Our pictures show Lord Londonderry in the cockpit of his plane and inset is a photograph of Lady Margaret.

## HEADS BANK COMMISSION

## No Paroles For Rod Riders

Alberta Relief Commission Chairman Would Send Men To Relief Camps Calgary, Alberta.—Efforts by A. A. Mackenzie, Alberta relief commission chairman to have paroles granted to rod-riders serving terms in Fort Saskatchewan jail, have failed. Alberta attorney-general's department has turned down Mr. Mackenzie's request.

The Alberta relief commission chairman had suggested vagrants convicted of stealing rides on trains should be sent to single-judge relief camps if they wished to go, while those refusing the offer should serve out their terms.

## B.C. Legislature Dissolved

### Elections May Be Held About Middle Of October

Victoria, B.C.—The seventeenth legislature of the province of British Columbia was dissolved by proclamation of Lieutenant-Governor J. W. Fordham Johnson, acting on the advice of Premier J. F. Tolmie and his ministers.

No official date was announced for the general election to follow, but voting is expected about the middle of October.

## Welcome For Prize Winner

### Plan Reception For Freeland Wilford At Stavely

Calgary, Alberta.—Premier J. F. Browne of Alberta and Hon. George Hoadley, Alberta Minister of Agriculture, are expected to attend the royal welcome being prepared to Freeland Wilford, winner of the world wheat king crown at Regina World's Wheat Exhibition and Conference, at Stavely, where his farm is located.

Wilford is expected to return to Stavely August 7.

## TRIBUTE IS PAID TO OLD TIMERS OF THE WEST

### Balloons Rise To Stratosphere

#### Record Temperature Of 87 Degrees Below Zero In Alberta

Calgary, Alberta.—A height of nine miles and a temperature of 87 degrees below zero is the record so far attained by meteorological balloons released from Calgary by Captain H. Bromley in connection with the polar year tests.

The start of the 22 balloons, equipped with instruments to record atmospheric conditions in the stratosphere, have been recovered. Dr. Bromley reports. The balloons have been released twice a month since last September.

### Want Shorter Hours

Winnipeg, Manitoba.—Adoption of shorter working hours in all Manitoba industries and more rigid enforcement of the Minimum Wage Act will be upon the provincial government by the Winnipeg Trades and Labor Council.

This is the golden anniversary of the Prince Albert fair. Today it drew the platform men prominent in the life of the province and the Dominion. With Mr. King were Sir Frederick Haultain, Chief Justice of Saskatchewan; Hon. J. F. Bryant, Minister of Public Works in the government of the province; T. C. Davis, a former attorney-general, and Charles Young, president of the Prince Albert Agricultural Society.

The Liberal leader expressed regret that the death of his mother had prevented Hon. J. T. M. Anderson, Premier of Saskatchewan, from attending the opening.

Introduced as "one of the outstanding real old timers of the west," Sir Frederick Haultain paid a tribute to the pioneer women of Saskatchewan. "We take off our hats to the old timers, but we take them off and keep them off to the women," he said.

Mr. Bryant, representing Premier Anderson, followed with the greetings of the government and people of Saskatchewan. He also expressed his pleasure at being on the same platform with the leader of the Liberal party. Some interesting facts about pioneer people of Prince Albert were told to the gathering by Mr. Bryant. Mr. Young introduced the speakers.

Then followed the parade. As the "old timers" marched by those on the platform rose in tribute to be followed by the great crowd in the stands. The pioneers smiled as a cheer arose. A tribute to their achievement for Canada.

## INTER-EMPIRE MIGRATION PLANS ARE ADVANCED

Quebec, Que.—Convinced the time has arrived for Canada to embark on a definite, moderate policy of immigration, particularly from Great Britain," E. W. Beatty, president of the Canadian Pacific Railway Company, returned from a visit to the United Kingdom. Mr. Beatty arrived with Hon. E. N. Rhodes, Minister of Finance, and the Canadian delegation to the World Economic Conference, on board the "Empress of Britain."

"The paucity of our population is still a drawback in view of the external and internal obligations of Canada," said Mr. Beatty. "I do not think this country has anything to fear from a deliberate but, of course, not extreme policy of admission of those of our own race in particular."

Plans for inter-empire migration were being very carefully worked out in the United Kingdom, he added, and there was hope of some results in a year or two.

Great progress industrially and financially is being made in the United Kingdom, said the railway chief. He believed the country's position was stronger than it had been for a long time.

British shipowners, he said, were tackling their problems in a serious way and he looked for important new policies respecting trade routes and possibly the elimination of idle, obsolete shipping. There might also be consideration of assistance from the government to put British shipping more on a par with that of other countries which had received generous assistance.

## Grain Judging Contest

### Ontario Wins Honors At World's Grain Show

Regina, Sask.—Ontario Agricultural College, Guelph, Ontario, won premier honors in the inter-college grain judging competitions at the World's Grain Show.

Saskatchewan University team came second, Alberta third, B.C. fourth, North Carolina fifth, Oklahoma College sixth, Manitoba College seventh, Minnesota University eighth, Nebraska ninth, and Iowa tenth.

Scoring 4,639 points out of a possible 6,690, Ontario by its win secured the team aggregate prize of a \$200 trophy, and Bruce Marshall Cohoe of Woodside, Ontario, receives a scholarship valued at \$600, having scored the highest individual aggregate of 1,612 points.

The Ontario team was composed of B. M. Cohoe, of Woodside, N. D. Hogg of Aron, A. W. Archibald of Seaford, and C. N. Heath of Cambridge.

The Saskatchewan University team, second place holders, secures one individual aggregate post graduate scholarship. Roy Blake of Saskatchewan was second. In the scoring, 1,605 points, and his scholarship is valued at \$500. The Saskatchewan team was composed of H. Van Vliet, Quinton; Roy Blake, Saskatoon; and E. Whewell, Griffin.

J. A. Lutz of Newton, North Carolina, whose team came fifth, secures a scholarship worth \$400 as third highest aggregate holder with a score of 1,600 and R. M. Putnam, Medina Hat, of the Alberta team takes the fourth scholarship, valued at \$300 with a score of 1,597 points.

The Alberta team was composed of B. M. Putnam, E. E. Swindellhurst, Edgerton; and J. L. Bolton, Lacimba,

## Trans-Canada Flight

### Proposal Made For Molisons To Fly Across Canada

Vancouver, B.C.—Prospect of Captain James and Amy Molison making a flight across Canada, possibly non-stop, is envisioned in communications exchanged between the flying couple and Major Louis D. Taylor.

Replying to an invitation to visit Vancouver, the Molisons wired "Many thanks for your kind wishes. We shall certainly bear in mind the possibility of making such a flight as you suggest. Unfortunately our new machine will not be available for some time."

The mayor, at the suggestion of W. J. Twiss, chairman of the airport committee, and Manager William Templeton, wired to the Molisons in New York that a trans-Canada flight would be of considerable interest to British aviation and added that a machine is available in Toronto. He referred them to Mrs. Amelia Earhart Putnam, whose guests they have been, and who was a recent visitor to the airport here.

## Gambling With Wheat

Speculators Control Prices and Fall Oil Grain Market

The ordinary man in the street must be a bit puzzled at the violent fluctuation in wheat. One day he reads that there is a great wave of buying at Winnipeg and Chicago, the central markets for Canadian and United States grains. Wheat shoots up to over a dollar a bushel, ten, fifteen, twenty and even twenty-five cents at a time. The same with corn, rye and barley. Next day he reads that the joyous feelings of yesterday have subsided. Wheat and the other grains have fallen by almost as much as they had advanced. Tomorrow he may read that they have shot away again. And so the game goes on. Up and down alternately amid frenzied excitement on the part of those who buy and sell grains by the hundred thousand or million bushels, and to whom a matter of a cent may mean millions. All the difference between being rich or poor.

Weather and other conditions do not suddenly create all that disparity in the value of grains. One does not read of violent fluctuations in the price of carrots, potatoes, cabbages or apples. Yet if they are subject to the vagaries of weather and pests in the same way that wheat is, the reason for the gyrations of the grain market, more especially wheat, is the manipulation by speculators who gamble with one of the vital sources of life. They bid for wheat that they never see and never intend to take delivery of. They possibly would not know wheat from barley if they saw two samples side by side. To them wheat is just something to gamble with. The interest of the millions of consumers means nothing to them.

The goings-on in the wheat exchanges were scathingly exposed by Upton Sinclair's famous novel, "The Prairie," and at that time it was assumed if something would result in the way of control of speculation. "Within the 'spread' is as much as twenty-five cents a bushel in a single day" there is room for reform everywhere. —*St. Thomas Times-Journal*.

### From Back of Beyond

Australian Girl Travels 13,000 Miles To Shop in London

Miss Joy Atkinson had to travel 15,000 miles from the Australian bush, riding fifty miles on horseback, and swimming across three rivers in which there are crocodiles, before she could get to London.

"And it was worth it," she said when interviewed. She is only twenty-eight, and has seen so much of life in the raw that it became monotonous. Her father is a cattle rancher.

She has gone to see London for the first time.

"Our farm, or station, as we call it in Australia, is a desolate stretch of country in Northern Queensland. The nearest town is Cairns, a small port 200 miles away.

"The station is larger than the whole of London. We have about 10,000 cattle."

"Our nearest neighbors are eighty miles away, but it is risky paying a social call as they might be out rounding up cattle. That means they might not be home for days on end. The nearest doctor and the nearest cinema are a hundred miles away."

"We have learned to do our own doctoring and for the cinema I take a trip of 2,000 miles to Sydney, where I have friends, if I want to see a really good show."

"Motoring?" Good heavens, no. There are roads within miles of the Atkinson station."

Miss Atkinson has been shopping in Bond Street.

"That is what I wanted to do most," she said.

Here is the endurance test Miss Atkinson had to pass before that hour in Bond Street was possible.

After riding fifty miles on horseback and dodging crocodiles in the three rivers across which she had to swim, she made a number of railway journeys in which the trains were held up for hours on end while sand was put on to slippery rails.

Other train services were suspended because the bridges were under water. Her luggage had been sent on two months in advance.

There was great excitement aboard the liner.

"Man overboard!" was the cry.

"Gentleman overboard, if you please," said Mrs. De Snobie, indignantly. "That's my husband."

"Babes," says a writer, "love bright colors." More hue, less cry.

Italy expects bumper crops this year,

### The Farm Horse

Can At Least Earn Its Keep At Any Price

The contention that man's abandonment of his old friend, the horse, is an important factor in the present economic situation finds strong support from the Census Bureau. In a pamphlet entitled "The Farm Horse," attention is directed to the decline of 6,313,696 in the number of farm horses and mules in the last decade. As a result of this decline—

"At least 18,000,000 acres of crop land, formerly required to produce horse feed, have been put into other crops. This added acreage, augmented by the release of that part of 3,000,000 acres of plowable pasture formerly devoted to horses, has resulted in surpluses of various crops and livestock greatly lowering farm purchasing power."

The purpose of this pamphlet is to encourage farmers to turn their attention to raising of horses and mules as a good business proposition. Signs of a return to increased use of horses and mules on farms have already appeared. That increase may for a time serve only to ease an unemployment situation for men, but one-fourth of the nation's horses and mules are said to have been thrown out of work by the tractor, the automobile and the truck. But even a gradual increase in the number of horses and mules would help to check over-production, and they could at least be made to earn their keep.—*New York Evening Post*.

### Five Ton Sculpture

Work of Epstein Is Creating a Sensation in London

Jacob Epstein's "Prineval Gods" five-ton sculpture, seven feet by six and one-half feet, is creating something of a sensation in London. The artist has been working on it intermittently since 1910. It is on view at the Leicester Galleries, where Epstein's "Genesis" drew thousands at the last show.

"Prineval Gods" is a centrepiece. Two vast cemented slabs of Hopton-wood stone are carved in deep relief, one with a male and two infant figures, and the other with the spread-eagled male figure known as the Sun God. It could be better judged in a park than at a bidding.

Epstein's master of plastic significance, Rameau, was born in New York, of Ruth and Polish parents, and is 53 years of age. He resides in London, England.

### Scheme Appears Senseless

Cotton Being Destroyed Although People Need It Badly

It's a crazy world. Across the line in the southern states, under the farm relief scheme, no less than 9,000,000 acres of cotton will be plowed under. In return the growers will receive \$10,000,000, divided among those who have signed acreage reduction contracts. If there were no people in need of cotton, one could see some sense in such a scheme; but, all over the world there are people who are in urgent need of the fabric but cannot afford to buy it. Isn't it a crazy world?

### Sausage Casings Exported

Many German sausages are evidently going to be served with Canadian casings, for the export of sausage casings to that country in May, 1933, was valued at \$19,099. Many went to Great Britain as usual, the value being \$22,458; to British South Africa, \$13,280; and to the United States, \$9,747. The total to all countries was \$67,529, compared with \$53,007 in April and \$43,447 in May, 1932.

### Meats Pay Church Debt

Feathered "Legions of the Lord" have aided in ridding Tennessee Methodist Church of its debt. The debt is claimed by Rev. C. C. Frye. Each housewife was to designate one hen, whose eggs would be devoted to the church fund. Each of these fowls was designated "The Lord's hen," and their eggs sold and money given to the church. As a result, the church's treasury is \$146 richer.

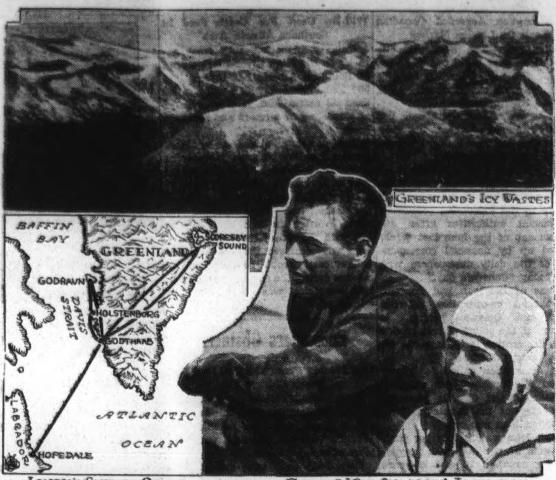

### Fast Air Service

Breakfasting in London in the morning, passengers of a new air service will be able to dine the same day in Switzerland. Swiss train connections, fitting in with the airway schedules, will enable one to reach many Swiss resorts in a few hours, while rapid air connections with Italy and Austria also will be available.

Austria is taking advantage of lower dollar exchange to buy more American automobiles.

Terrible wind storms rage 60 miles above the earth, it is believed.

### LINDBERGS TO BRAVE ICE MOUNTAINS

COL. AND MRS. CHARLES A. LINDBERGH

Colonel Lindbergh's aerial survey of Greenland, on which Mrs. Lindbergh accompanies him as radio operator, is one of the most hazardous of the numerous aerial exploits. Their task is to survey and photograph the coast and ice cap for possible landing places for the proposed trans-Atlantic air service of the Pan-American Airways. The Lindberghs will twice fly across the icy wastes between Godthaab and Scoresby Bay. An emergency plane is in readiness at their base to fly to them if needed. Col. and Mrs. Lindbergh made the hop from Hebron, Labrador, to Godthaab in six and a half hours.

### Mecca's Holy Carpet

New One Is Taken To Great Mosque Every Year

The Holy Carpet, which is now being carried with great pomp from Cairo to Mecca to cover the Kaaba in the center of Mecca's Great Mosque, is made of black brocade with inscriptions woven into it in gold and silk.

These carpets are renewed each year, and when the old one is taken it is cut and sold to the pilgrims fifteen days after the new one is put down.

All carpets have special significance for Moslems. Every one, whether used in the home or elsewhere, has an interpretation of its own.

The color decides the meaning. Thus a white carpet means sorrow, a black one means illness and trouble, red or purple represent dignity, and yellow, honor and promotion.

### Search For Crude Oil

Will Endeavor To Locate Field In Alberta To Renew Diminishing Supplies

Efforts to locate crude oil in Alberta will be renewed immediately by Imperial Oil Company, it was announced recently. Work will start on the Conroy structure, consisting of 7,600 acres, about 100 miles south of Medicine Hat, near Manyberries.

J. H. McLeod, production manager for Imperial Oil, pointed out that large quantities of crude had to be imported from Baffin Island and the Yukon Valley oil fields of Alberta. He said Montana supplies were diminishing rapidly and there was a possibility unless crude oil was located in Alberta soon, it would have to be imported from distant fields.

The total quantity of solids deposited last year over London, in the form of soot, was 284 tons per square mile. The worst record of this kind was held by Ashington, Northumberland, with 738 tons per square mile.

Women are carrying economy too far. We heard of one who had only twenty-six candles on her forty-second birthday cake the other day.

### Art Of Clipping Trees

Dealers Always Search For New Designs In Holland

The art of training and clipping trees in curious designs and in the shapes of animals is rapidly returning to fashion in England, says an article in Pearson's Weekly.

Young trees, to be trimmed and shaped by the gardener, can now be bought for a small sum. Trees already shaped cost a pound and upwards, while really intricate designs such as a spiral with figure of a bird on the top cost about ten pounds.

The largest and most delicate trees may fetch as much as fifty pounds. The largest and most intricate such a tree is estimated to cost a cent of a hundred dollars to produce.

Bird figures are the simplest for the amateur topiary to cut, and they take between five and ten years to reach maturity. Dogs require twelve to fourteen years' growth, a perfectly rounded ball tan and a pyramid, 3 feet high, about fifteen years.

Dogs and intricate designs have to be trained and supported on wires while they grow, but plain bird shapes are made by splitting a bush during its early life, wiring across and trimming every autumn.

Advantages of climate and hereditary skill of her people in the art have made Holland the modern source of topiary, where dealers from all parts of the world search for good designs. The dealers are sometimes both Wright, the producer, and usually a remote farmer, a substantial cash sum for an "option." The balance is paid some years later when the tree is ready for the market.

Britain is beginning to take a new interest in the art, and there are now extensive commercial gardens here where thousands of trees are mannered.

Women are carrying economy too far. We heard of one who had only twenty-six candles on her forty-second birthday cake the other day.

### Less Salmon Packed

Industry In British Columbia Behind Last Year's Mark

British Columbia's salmon pack is behind that of last year, according to figures issued by the chief supervisor of fisheries.

So far this year 23,440 cases, each weighing 45 pounds, have been packed, as compared with 42,456 at this time in 1932. In 1931, the pack at this date was 45,868 cases; in 1930, 85,865 and in 1929, 57,746 cases.

This year's pack is made up of the following varieties: Sockeye, 11,356 cases; Chinook, 5,960; spring, 1,956; coho, 1,234; steelheads, 101; the mode of the pack is from the Fraser, 1,964; pink, 3. The largest portion area.

**Uskers In Outdoor Theatre Use Bicycles**

Incoming Motor Cars Are Safely Guided To Position

One of the first outdoor theatres, where you take a car to the movies, has just installed uskers on bicycles.

The rows of seats are so banked that in the rear seat of an automobile can be seen the picture.

After two weeks the promoters discovered that the walk from the entrance to the "seats" or parking place, was so long that the uskers were unable to accommodate the patrons.

Now uskers ride in front of the incoming cars leading the machine with a tiny red light on the rear.

### Nominate Many Candidates

C.C.F. Getting Ready For Elections In British Columbia

British Columbia may be made a testing ground for working out of Co-Operative Commonwealth Federation ideas, as laid down in the recent convention at Regina. If the federation can gain power in the coming provincial elections. This was stated by W. A. Pritchard, former reeve of Burnaby, B.C., who spoke at Vernon while en route home from the Regina gathering.

The federation has already nominated some 25 candidates in British Columbia.

### The Worm Turned

A young Yorkshireman had been on the witness stand a long time, bearing as best he could with the nagging and prodding of a flippant barrister, who aimed shafts of wit mercilessly at the unfortunate youth.

"So," exclaimed the barrister sarcastically, "you really do not believe that you could rout an army of Philistines with the jawbone of an ass?"

"Well," replied the exaggerated countryman, "I might have a try with the article when you're done with it."

Annual loss through forest fires in Canada amounts to approximately one dollar for each man, woman and child in the Dominion, according to government figures.

The explorer Rasputin once drove 94 miles with dog sleds in one day.

Australia fears a plague of eagles.

## Searching For Steel Alloy

World Scientists Waging Secret Fight Involving United Millions

Today half a dozen nations are engaged in a silent secret struggle for a prize of millions. The fight is being waged in laboratories; the fighters are scientists; and the prize is a steel alloy lighter, stronger and more elastic than ever before.

The nation that wins will be able to revolutionize ship and aircraft construction, bridge designing, building and engineering. The discovery will create a new era in industry and make a vast national fortune.

The object over which the world scientists are fighting is a metal called beryllium. Twenty-five years ago nobody thought it had any use other than as a basis for the semi-precious stone the beryl, worn in necklaces and rings.

But when aeroplanes and modern metallurgy brought a demand for light strong metals scientists turned their attention to beryllium and sought to commercialize it.

Then beryllium soared to great heights of value. Ten years ago, after a lot of research, it was worth about \$25,000 per pound. Since then, owing to increased knowledge of it and the discoveries of fresh sources the price has fallen to \$75 a pound.

For the past ten years the research into the possibilities of beryllium has been intensified. The two leading rivals in the race for the conquest of all its secrets are Germany and Britain.

In Britain the National Physical Laboratory at Teddington are working with X-rays, microscopes and highly intricate processes. In Germany the famous firm of Siemens-Halske, whose works outside Berlin are so vast that they have created a self-contained township, have a team of ten men of science, each working on a special study of beryllium.

Britain's general in the beryllium campaign is a young scientist, H. A. Cleman, working at Teddington as a link between science and industry. He is carrying on the work of Dr. C. Vivian and Dr. Rosehain, which started ten years ago.

Their great objective was to produce a pure specimen of beryllium; a metal with a small percentage of impurity is too brittle for use. Dr. Vivian produced a specimen with only 0.6 per cent impurity.

Mr. Stoenas has spent years of patient experiment and research in eliminating the various forms of

With the X-ray he probed the structure of the structure of beryllium, and step by step he slowly discovered how to eliminate the tiny impurity.

Now, at last, he has triumphed. He has produced a lot of pure beryllium, smooth, polished-like steel, with a suggestion of silver.

The next step in the silent struggle between nations is to apply this vital discovery to industry, to commercialize it, and start the revolution in engineering and trade that will repeat the story of Bessemer steel, radio and airline dyes.

The nation that has the ore deposits and the secret process can capture the market and lead the world.

Britain is well in the running. We have deposits of beryl in Cornwall, Aberdeenshire and Ireland. In the empire, South Africa, Canada, Australia and India have rich deposits.

### Can Turn Time Backward

Austrian Scientist Says Rocks Indelible Record Of Their History

A new way of turning time backward, enabling geologists to map with blueprint accuracy the mighty mountain-making, rock-wearing catastrophes of the earth's past, has been discovered by an Austrian scientist.

The new method was devised by Dr. Bruno Sander of Innsbruck, Austria, who told the International Geological Congress about it.

Rocks preserve within their internal structure an indelible record of all movements they have undergone since their first creation. Dr. Sander explained.

### Local Business Essential

In order to be of the greatest value to its community a newspaper must receive local business from subscribers, advertisers and users of printed matter, a sufficient amount to be able to put out a paper worth while. The better support our home paper gets, the more able it is to serve the community.

Japanese will build a motion picture producing studio and movie theatres in Manchuria.

Did you ever notice, that in a group picture, you always look worse than anyone else?

## Occasional Wife

EDNA ROBB WEBSTER  
Author of  
"JORETTA",  
"LIPSTICK GIRLS" ETC.

## SYNOPSIS

Camilla Hoyt, a young and beautiful student, sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian statue, envisions the head of Peter Anson the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A man approaches her and it turns out to be Peter, who apologizes for his action and consoles her. Camilla seriously admires him. He makes a date to see her that evening at an expensive night club. It is far beyond his means but he resolves to go through with it.

(Now Go On With The Story)

## CHAPTER III.

"Good evening sir," said the butler. "Good evening," Peter replied. "I'm Mr. Anson, calling for Miss Hoyt."

"Yes, Sir. Come right in, sir." Peter stepped into the cavernous hall. He hoped that he wouldn't have to meet the family. His apprehensions were relieved at once by a familiar voice from above. "Bates is that Mr. Anson?"

"Yes, Miss Camilla." His austere voice implied his disapproval of her unconvincing answer.

"Tell him I'll be right down."

"Miss Camilla." He turned solemnly to Peter as if he had come a long way with the message. "Miss Hoyt will be right down sir."

Peter grinned. "So I heard."

"Yes sir!" Bates inclined his torso slightly, straightened and marched away stiffly.

Camilla fluttered down the broad stairway like a brilliant flower. Diaphanous folds of soft bright yellow swirled from below a snug little bodice jacket of spring green, like the skirt of a daffodil flutter from its green calyx. The bright colors emphasized the blackness of her eyes and hair and Peter had to remind himself severely that she was Camilla Hoyt the unattainable.

"Sculpture is one of them," suggested Camilla.

"I've several of them, and that's about all I can consider for awhile," "will the other important things wait?"

"I hope they will," his voice was lower. "But they might have to wait a long time. Trouble of it is, life is too short. We need to do everything at once, and if we don't, we soon discover it's too late to begin."

"What—for instance?"

"Whatever a man's ambitions are. And sometimes we even outgrow them, waiting to realize them. A person can miss a thing he wants to do for so long that he finally discovers he doesn't care about doing it anymore. You hold an ambition ahead of you for a long time, then when you finally catch up to it, you discover that in the process of growing up to it, you have gone beyond it in experience. That is especially true of minor ambitions. Ever think about that?"

"No," Camilla replied. "I never did much thinking about anything until recently, and I've been all mixed up that I haven't arrived anywhere yet."

He laughed indulgently. "Oh, well, why should a girl like you try to think? You don't have to. I should not trouble you with my philosophy. Guess I think too much alone. I'll try to snap out of it and be a better entertainer, more like the ones you are used to."

"But I like you to be serious and philosophical, different from the others," hastily. "If you know how weary I am of—oh, all this—waste of time and energy—being with people I don't like—"

"Then you would rather not have come tonight—"

"Oh, yes! That's just what I'm trying to tell you. You are different, and that's why—I like you," she finished gently, her soft eyes turning to him with appeal.

He shivered, with a delightful sen-

in the dimly-lighted theatre and look up to feel his eyes and lips close to hers when they exchanged murmured comments. The splendor of the stage, the swaying velvet curtains, the gowns and jewels and sumptuous luxury of the audience oppressed her. It might be a different—it?

But Camilla resolved that such thoughts should not mar this perfect evening. Perhaps never again would she have the exquisite joy of being close to Peter, alone with him, his eyes caressing her at every glance. She must tell him the truth. Of all the people in the world with whom she wanted to be fair—it was Peter, even if she never saw him again.

Her friends sought them in the lounge during the intermission. Cathie insisted that they join her party in their box, but Camilla refused. This was her evening with Peter, and she was determined that no one should interfere. Peter wondered, uncomfortably, if she were reluctant to join his friends because she was ashamed of him. But whatever her reason might be, he was grateful to return with her after the intermission to their own seats, for which he had paid the extravagant sum of \$6.00. It was the price for sitting back Camilla for three hours. It was worth it. In the two months since he had discovered Camilla Hoyt in Professor Drake's class, he never had dared hope to be so near to her.

He was anxious for her pleasure. "Do you like the show?"

She was anxious to reassure him. "Very much. Don't you?"

"Sure," he agreed, but was thinking how much it had cost him and wondering how he would recover the loss. The show wasn't worth it, but being with Camilla compensated for any loss.

At the last curtain, he asked, "Did you say you liked the Maddox?"

"Wherever you wish to go."

"That's okay with me, too," he said easily, but he never had been there before.

The captain waiter did not recognize Peter, but he knew Camilla and ushered them to a choice table with sumptuous bows. "That required a generous tip," Peter reflected. They were just seated when Cathie and her escort rushed up to greet them. They were nothing but girls to do but invite them to take a few more. Terry Wayne, it appeared, welcomed the idea because it gave him an opportunity to dance with Camilla. Peter guessed that she could go places and do things with Terry any time she wished. But she was not too gracious to him; he also noted with satisfaction.

Peter marvelled at the way she danced. It was no mystery why any man would want her for a partner. He hadn't given much time to such pleasant recreation, and regretted his lack of practice. But Camilla was like thistledown floating on the wind, and he was the wind that carried her hither and yon, only deliciously conscious that he held her in his arms and that nothing else in the world mattered very much just then.

"Do you mind so very much if I can't sketch Grecian urns?" she taunted him, laughing up into his face.

He lowered his lips close to her ear. "I'd be very sorry if you could. Because you might not dance so divinely or look so heavenly as you do. You are like a sculptor's most exquisite model come to life—his masterpiece."

Peter decided that this was an excellent opportunity to enter the inner circle, if only as a bystander, and discover what it would be like. It wasn't that he sought personal approval. He only desired success. But he knew that the two were inseparable. It was evident that he could command the former without the latter, however Camilla resented the way Cathie Harris and Lillian Berger flirted with Peter and let him know that he would be welcomed into their set at any time. She wondered if Peter knew—and led him away.

She had not wanted to see the dazzling, extravagant revue, but it was thrilling to sit close beside Peter

terpiece of inspiration given breath—"his Galatas."

Camilla caught her own breath happily, not daring to think. She just drifted in ecstasy until the music stopped.

(To Be Continued.)

## Canadian Pure Food

## Great Care Taken With Canned Goods To Assure Purity

The Pure Food Laws of Canada state: "Canned fruits and canned vegetables must be made by sterilizing clean, sound, prepared fruit and prepared, fresh fruit or vegetables by means of heat, and keeping the same in suitable, clean containers, closed hermetically or otherwise, and to conform in name to the particular fruits or vegetables in their preparation." No adulterant, preservative, or artificial colouring matter may be used in commercial canned fruits or vegetables. Therefore, they contain only pure water, sugar and salt. Tomatoes may have no added water, and the juice must be the juice from the particular lot of tomatoes. There are on the market at present over thirty-five sizes of cans. Only eleven of these are standardized. All containers not of standard size must have the net weight and drained weight of solids plainly stated on the labels.—Dominion Fruit Branch.

## SUNBURN

RELIEVED OR PREVENTED BY "MECCA"

Excessive Sunburn is both painful and dangerous. Prevent it by rubbing in Mecca Ointment. It quickly stops pain, soothes irritation, relieves sunburn. "Mecca" is both economical and reliable.

Mecca Ointment is sold by all Drugstores. Price 30c and \$1.00. 43

OINTMENT

## Little Helps For This Week

"Be strong and of a good courage; be not afraid, neither be thou dismayed; for the Lord thy God is with thee whithersoever thou goest."—Joshua 1:9.

By Thine unerring Spirit led We shall not in the desert stray; We shall not miss our providential way. As far from danger as from fear, While love, almighty love, is near. —Charles Wesley.

Watch your way then as a cautious traveller; and do not be gazing at the mountain or the river in the distance and saying "How shall I ever get over them?" Keep straight to the present little inch that is before you, and accomplish in the little moment what belongs to it alone. The mountain and the river can only be passed in the same way, and when you come to them you will come to the light and strength that belong to them.—M. A. Kelly.

Let not future things distract thee, for thou wilt come to them with the same reason which thou now usest for present things.—Marcus Antoninus.

## Arab Ruler Visits London

King Feisal Royally Welcomed On Visit To London, England

Huge crowds cheered King Feisal and his imposing suite, Arab figures arrayed in colorful robes, on their arrival yesterday through London. The ancient City Guildhall for luncheon. Fleet Street, the Strand, and Ludgate were on fire gray with a flutter of innumerable cosmopolitan flags and pennants, and King Feisal, in white and gold with an Alexandria rose, riding with his glittering Life Guard escort responded to the crowd's greetings with a debonair salute. Mindful of a former fauna, the City caterers avoided lobster salad, that fish being taboo in the East as the scavenger of the seas, and under the same ban as the pig. Amongst the royal suite were Arab warriors who fought on both sides in the Great War, and Nuri Pasha, Aircraftman Shaw's trusty lieutenant in the Arab revolt that made possible Lord Allenby's victory campaign in the East.

King declared his stay in the West End was to be a brief one, and he intended to visit the British Museum, the Royal Opera House, and the Savoy.

Stability In Exchange Rates And Prices Desired By Dominions

The British Empire emerged from the world economic conference with an agreement in which the Dominions and the mother country declared for stability of inter-empire exchange rates.

This was made known in a declaration by the British delegates to the conference in which it was acknowledged that the United Kingdom is not committed to any policy of keeping the pound sterling at any fixed ratio to the currency of another nation.

The declaration was signed by the United Kingdom, Canada, Australia, New Zealand, South Africa, and India. The Irish Free State did not sign but the Dublin representative referred the matter to his government.

The empire delegates called for ultimate restoration of an international gold standard. The problems facing gold, they held, is to reconcile stability in exchange rates with a reasonable measure of stability in world prices.

Directed Bombing Of London

Admiral Ludwig von Schroeder, "The Lion of Flanders," who is dead at the age of 79, was on the retired list when the World War started and was recalled to become director of the bombings of London. Under his direction the U-boat attacks on Dover were organized, as well as the flights of the zeppelins to London.

Quiet Efficiency

The person who approaches a task with a great fuss and clatter, tells everybody how good he is, carries the burden of the world on his shoulders, has much to learn from the chap who tackles the job in hand coolly, quietly, competently—in a word, with "effortless efficiency."

Four Types Of Farming

The four main types of farming in Canada are to be found in (1) the eastern group, or Prince Edward Island, Nova Scotia and New Brunswick; (2) the central group, or Quebec and Ontario; (3) the prairie group; and (4) British Columbia.

Traveler: "It's a nuisance—these trains are always late."

Resourceful Conductor: "But, my dear sir, what would be the use of waiting rooms if they were on time?"

Lightning conductors are to be placed on historic trees in Czechoslovakia.

Appleford Paper Products

HAMILTON, ONTARIO

You Are Different.

Peter was so handsome in his evening clothes that he almost took Camilla's breath away. In fact, both of them were so flustered with the realization they were together at last, that they were silent for some minutes after they were settled in the cab.

"Sorry that I couldn't have a car for you, tonight," he began awkwardly.

"I don't mind," she said quickly. "I have an idea that you are one of those generous persons who would give up anything he had to anyone who happened to need it more."

Her reply was misleading, but after a fleeting hesitation, he let it go at that. "Do I look that easy?" he demanded.

"About things that don't mean much to you. And I guess that maternal possessions don't."

"Well, that's better. Anyway, there are only a few things that mean a lot to me. Everything else is just accessories."

sation at her words. "Steady, then," he admonished himself. To Camilla, he said gently, "that's nice. I'll try to deserve your liking—me."

In the incandescent glare of the sumptuous theatre foyer, Peter was ill-at-ease, but his manner did not betray his fear of committing some social faux pas in the presence of the elite. His own humiliation would be serious enough, but Camilla's would be unpardonable. Of course, they encountered friends of Camilla's, who inspected him critically when he was introduced. Society bored him, but he realized that if he were to become successful in his profession, that human element would have to command a prominent place in his life. Fame embraced more than public adulation of accomplishment, it demanded for that public a complete surrender of the private life and affairs of the adored. There was no escaping the payment for fame.

Peter decided that this was an excellent opportunity to enter the inner circle, if only as a bystander, and discover what it would be like. It wasn't that he sought personal approval. He only desired success. But he knew that the two were inseparable.

It was evident that he could command the former without the latter, however Camilla resented the way Cathie Harris and Lillian Berger flirted with Peter and let him know that he would be welcomed into their set at any time. She wondered if Peter knew—and led him away.

She had not wanted to see the dazzling, extravagant revue, but it was thrilling to sit close beside Peter

## NERVOUS WOMEN

Take Lydia E. Pinkham's Vegetable Compound

"I am so nervous it seems as though I am crazy," "it's with me all the time," "how often have we heard these expressions?" Lydia E. Pinkham's Vegetable Compound is a tried and true remedy for nervousness.

No woman should allow herself to become nervous. She should give Lydia E. Pinkham's Vegetable Compound a trial. It is wonderful to give to her nervousness.

96 out of every 100 women who report to Lydia E. Pinkham's Vegetable Compound come to her for relief.

Take Lydia E. Pinkham's Vegetable Compound and get rid of your nervousness.

Lydia E. Pinkham's Vegetable Compound is a tried and true remedy for nervousness.

## Village Council Meeting

The regular monthly meeting of the Village Council was held in the Fire Hall on Monday evening last. Present were Mr. Williams and Councilors C. Aspinwall and R. Nichol. Outside the regular business routine of village affairs nothing of importance was brought up at the meeting.

Cutting of barley is reported on a number of farms east of town, and with continued good weather the cutting of wheat will commence next. It is not expected, however, that cutting will be general for another two weeks.

## NOTICE

The School Fair Directors being dependent largely on funds, will grant the privilege of operating a refreshment booth on the Fair Grounds on September 7th to the highest bidder. Full particulars from the Secretary.

Bids to be in my hands not later than August 26th, 1933.

H. MAY, Secretary

## Local News

Mr. and Mrs. Chas. Mielond were visitors in Calgary on Sunday.

George Lem was a visitor at Lacombe on Sunday.

Mr. and Mrs. Jack Collins were visitors in Calgary on Tuesday.

F. D. Parker of Madden was a business visitor in town on Thursday.

Mrs. W. Major is spending a few days at the farm home of Mr. and Mrs. D. Cumming.

Miss Florence Cruickshank left on Sunday to visit friends and relatives at Wayne.

Mrs. Chas. Fox and son Gordon returned on Monday after spending the past six weeks at the coast.

Mr. and Mrs. R. J. Hendry and Mr. and Mrs. Wm. Stralo were visitors at Banff over the week-end.

Master Freddy and Headly Wallock of Three Hills, are visiting in town this week.

The ladies of the Anglican Church Sewing Circle were the guests of Mrs. Bartlett on Tuesday afternoon.

Mrs. Richards and children of Calgary were visitors at the home of D. K. Fike on Sunday.

R. M. McCool, M. L. A. returned on Sunday evening after spending a week with the Tuxis Boys at Sylvan Lake.

A dance will be held in the new Cremona Hall on Friday night of this week. Calgary music.

Mr. Huser has purchased another Holt combine, which was unloaded here Monday. This gives Mr. Huser two combines.

Mr. and Mrs. Morley Turner and family, and Mr. and Mrs. Marston of Calgary, were the guests of Mr. and Mrs. Jas. Belslaw on Sunday.

If you are working for your personal gain financially or otherwise become a member of the Board of Trade.

Mrs. R. M. McCool returned home on Sunday after spending the past week visiting friends in Calgary.

Mrs. Moxin and daughter Flora of High River, were the guests of Mrs. Cruickshank on Friday, and Saturday.

Mrs. Frances Monkman who has been the guest of Mrs. J. R. Gilchrist for the past three weeks left for her home in Calgary on Friday.

We notice Walter Spivey had a wonderful display of dahlias, in fact he has a splendid garden, well worth a visit of any one interested.

Mr. and Mrs. A. Heywood have moved to the Christiansen house, lately vacated by Mr. and Mrs. Kursteiner.

Mr. and Mrs. "Bob" Whitfield and sons Robt. and George of Alix, were the guests of Mrs. Alderly on Sunday. Mrs. Whitfield is remaining here for a few days.

Don't forget the dance in the Beaver Dam Hall on Saturday night of this week. Brorbridge orchestra. Admission 25 cents.

Miss Isabel Leask of Madden, who attended Central High School, Calgary, passed her Grade XII examinations (taking eight subjects) with an average of 81 per cent.

The Shorthorn Tuxis Boys who are in camp at Sylvan Lake are having a wonderful time. They expect to return home on Friday or Saturday of this week.

Grade XI results came out on Saturday morning and among those who passed in all subjects are Wilda McTavish, Margaret Fitzpatrick, Alma Gordon and Maureen Emery.

Eleven men turned out for the Legion bee at the farm of Mrs. Stone on Tuesday and accomplished a real day's work. They expect to return at some other time and finish the job.

Parents are asked to warn their children against damaging trees in the park. On a stroll around there the other morning we noticed a lot of limbs broken off the trees and lying on the ground.
